

GAURAV PATIL

Software Engineer

CAREER SUMMARY

I'm a Software Engineer working mainly on web applications and backend systems.

I've built APIs and worked on improving performance in production environments.

I like keeping code clean and solving problems that actually matter.

Outside work, I build side projects to learn and experiment.

WORK EXPERIENCE

Software Engineer II

Catchpoint

~Mar 2025 – Present · Remote (Bengaluru)

- Worked on both frontend and backend to build and ship product features end-to-end
- Worked on JSP-based scripts injected into client applications to collect real user performance metrics
- Developed UI components and backend APIs with a focus on performance and maintainability
- Collaborated with team members to turn requirements into reliable, production-ready features

Software Engineer I

Catchpoint

Oct 2023 – Mar 2025 · Hybrid (Bengaluru)

- Built and maintained UI components and backend APIs for core product features
- Worked across frontend and backend to improve functionality and system reliability
- Contributed to better validation, smoother releases, and improved debugging
- Focused on writing clean, maintainable code and improving overall developer experience

PROJECTS

CivilCalc Pro (Android App)

- A construction estimation app for material, quantity, and workflow calculations – built for the field with offline-first usability, saved projects, and PDF/CSV export. Available on the Google Play Store.
- Skills : ReactNative, Typescript, Expo, SQLite
